1. Examinations and tests

The type examination of the 2-panel central opening landing door C-01 M2P existed from assessing the technical file. The test was executed on September 10, 2021 at TSE Turkish Standards Institution Headship of Test and Calibration Center, Turkey. All results for fire resistance are described in report no. 635738, dated 24-09-2021. Liftinstituut recognizes the test and results. Report 635738 is part of this examination (see annex 1).

2. Results

After the final test the fire resistance results of the lift landing door were ranked in accordance with the requirements (classification) of the standard EN 81-58. See report 635738, Chapter 6 for field of direct application of test results.

3. Conclusions

Based upon the results of the type-examination, Liftinstituut B.V. issues a certificate for the fire resistance of the landing door C-01 M2P.

The type-examination certificate is only valid for products which are in conformity with the same specifications as the type-certified product. Products deviating of these specifications need additional examination by Liftinstituut in order to determine whether a new type-examination certificate is necessary. Additional examination shall be requested by the certificate holder.

The type examination certificate is issued based on the requirements that are valid at the date of issue. Liftinstituut reserves all rights regarding the validity of the certificate with respect to changes in requirements or changes in state of the art of the product.
